

CITAGLOBAL

Empowering The Future

Corporate Profile

Introduction

Citaglobal Berhad ("Citaglobal") is a Bumiputera-controlled Public Listed Company on the Main Market of Bursa Malaysia.

We are principally involved in Energy, Telecommunications, Civil Engineering & Construction Property and Manufacturing.

Citaglobal aims to become a leading player in technology-driven industries that empower the future.

Ventures into Submarine Cable Laying Business

Citaglobal acquires 30% stake in submarine cable system company iFACTORS for RM25m

KUALA LUMPUR (Oct 26): Citaglobal Bhd has acquired a 30% stake in submarine cable systems company iFACTORS Sdn Bhd for RM25.2 million, the infrastructure group said in a statement on Thursday.

This confirms a report by The Edge that the group was venturing into submarine cable laying.

The stake acquisition comes with a two-year profit guarantee of RM21 million, and to date, iFACTORS has an order book of RM528 million, the group added. Meanwhile, the group also highlighted that it has an option to purchase another 21% stake in iFACTORS once the profit guarantee of RM21 million has been met.

“We see a huge opportunity in welcoming iFACTORS into the Citaglobal family and supporting them in their next chapter. For the Citaglobal group, this acquisition unlocks immediate access to the lucrative submarine cable systems market.

“The board is confident that this venture into the submarine cable business will enable the group to diversify its revenue and earnings streams, enhancing our profitability and creating value for our shareholders,” said Citaglobal executive chairman and president Tan Sri Mohamad Norza Zakaria.

Shares in Citaglobal finished two sen or 1.27% higher at RM1.60 on Thursday, giving the group a market capitalisation of RM668.15 million.

Venture into Renewable Energy

Venture into Renewable Energy

1

Citaglobal's energy segment involves construction related activities and specialised engineering services. They are consisting of engineering, procurement, construction and commissioning of energy and utilities projects.

2

Citaglobal is expanding its know how into renewable energy transition with focus on integrated green energy engineering, construction, installation and commissioning.

3

Citaglobal aspires to expand its footprint in the region. Its renewable energy solutions encompass Solar, Battery Energy Storage System ("BESS"), Carbon Capture and Biogas Engines. Leveraging on these strategies, Citaglobal is confident to achieve its aspiration to emerge as a leading regional player in renewable energy industry.

Venture into Renewable Energy

Citaglobal wins 30-year concession to power up ECRL

Citaglobal-Reneuco consortium wins 30-year concession to power up ECRL

February 22, 2024

KUALA LUMPUR (Feb 21): A consortium between Citaglobal Bhd and Reneuco Bhd has secured a 30-year concession to supply electricity to the East Coast Rail Link (ECRL) from project owner Malaysia Rail Link Sdn Bhd (MRL).

The concession includes the development of power transmission and interconnection facilities valued at RM600 million, which is expected to be commissioned in stages by mid-2026, the two companies said in separate statements.

It also carries an option for MRL to renew the concession for an additional 30 years, the companies said. Citaglobal, which is in engineering and construction, owns 60% of the consortium, while Reneuco, a utilities services firm that recently fell into Practice Note 17 (PN17) status after its external auditor issued a disclaimer of opinion on its accounts, owns the remaining 40%.

The conditional contract follows a separate tender won by a 50:50 joint venture between the two companies in December 2022 to develop an independent power producer (IPP) project for the rail network. At the time, the proposal submitted by the JV involved the supply of electricity to commercial and industrial parks along the ECRL's 665km alignment from Port Klang, Selangor to Kota Bahru, Kelantan.

While Citaglobal and Reneuco did not reveal the size of its IPP tender then, the latest win on Wednesday includes plans for their 60:40 consortium to provide up to 100MW of renewable energy (RE) to enable the ECRL network "to achieve an energy mix of 30% green energy", the statements read. The power supply contract is exclusive and will provide electricity for both traction and non-traction systems of the rail project, they noted.

The contract will allow Citaglobal to broaden its presence in the energy sector, particularly the RE segment, and further diversify its revenue and earnings base to build recurrent income streams, said executive chairman Tan Sri Mohamad Norza Zakaria.

ENERGY

By SYAZWANI HASNIZAM
syazwani@thestar.com.my

DUBAI: A comprehensive policy which provides full support to local players is essential to move the national renewable energy (RE) agenda a step further, according to Citaglobal Bhd.

Executive chairman and president Tan Sri Mohamad Norza Zakaria said the group is ready to execute new RE-related projects, in line with the framework to be implemented by the government.

"We want to highlight to the government that we are fully supportive of the policies and we are more than ready and eager to start as soon as possible," he told *StarBiz*.

An agreement ceremony of Citaglobal and TIZA Global Sdn Bhd as a consortium, together with Abu Dhabi Future Energy Co PJSC (Masdar), was signed with the total development cost of RM9.75bil last Friday at the United Nations climate change conference or COP28 here.

With the earlier memorandum of understanding (MoU) signed with Shanghai SUS Environment Co Ltd for waste-to-energy projects in October, which was estimated to inject an additional RM15bil in terms of foreign direct investment (FDI), Norza said the government and Citaglobal are working hand-in-hand to encourage more FDIs into the country.

"The foreign investors hope to get some form of support from our government either in the form of incentives or relaxation of policies which are competitive in the region.

"We hope the government will help to facilitate this, and we will also play our

Support for local RE players crucial

Citaglobal says a comprehensive policy is timely

"We are just at the beginning and there are many more new opportunities knocking on our door but we will only choose those that bring the most value to our shareholders."

Tan Sri Mohamad Norza Zakaria

part," he said.

On the agreement with Masdar, Norza said: "This shows the intention of the parties to work together and it isn't just talk. This demonstrates clearly that if all stakeholders work together, projects can be materialised."

The project involved the proposed development of up to 2GW of RE, and will see the construction of ground-mounted solar arrays, floating solar farms and battery energy storage systems (Bess) across multiple sites in suitable land, dams, and lakes across Pahang.

Norza said Citaglobal's overall strategy is to build up its order book via being

turnkey contractor.

Once it has grown in size over the next five to 10 years, the company would progressively become an asset owner.

The asset-light strategy is to ensure Citaglobal grows its balance sheet and capital structure in an orderly manner.

"We will certainly invest more in asset owners when our balance sheet is stronger," he said.

Bess is anticipated to be one of the largest components of RE in Malaysia moving forward, according to Norza.

This is due to intermittency of energy supply, and the need to strengthen and stabilise the national grid.

"We are just at the beginning and there are many more new opportunities knocking on our door but we will only choose those that bring the most value to our shareholders," he said.

He said based on the group's existing order book of more than RM1bil, the construction sector will temporarily contribute to the bulk of its profits while building for the renewable energy and telecommunication sectors.

"Nonetheless, it is our goal to transform to become an RE and telecommunication player in the future," he said.

In addition, he stated the group is constantly looking for suitable partners who can join forces with Citaglobal to make the 2GW project a success.

Parties such as TNB Renewables Sdn Bhd, a wholly owned subsidiary of Tenaga Nasional Bhd, and SPIC Energy, a subsidiary of China State Power Investment Corp, are among the external parties that have expressed interest to be a part of the project.

On a separate note, Citaglobal is one of the main sponsors of the Malaysian Pavilion at COP28 with the intention of making a significant and powerful impact in the RE space.

Venture into Renewable Energy

Citaglobal and Masdar ink MOU with TNB Renewables for Participation in Pahang RE Project

Citaglobal, Masdar, and TNB Renewables partner for a RM9.75bil solar farm in Pahang

NEW STRAITS TIMES

December 4, 2023

TNB Renewables Sdn Bhd (TRe), a wholly-owned subsidiary of Tenaga Nasional Bhd (TNB), is keen on a partnership with Citaglobal Bhd for the development of renewable energy (RE) projects in Malaysia

Potential areas of collaboration between TNB and Citaglobal include Project 2GW, a US\$2 billion (RM9.75 billion) 2-gigawatt (2GW) solar farm project in Pahang.

A 60:40 consortium for Project 2GW, comprising United Arab Emirates (UAE) state-owned renewable energy company Masdar, Citaglobal and TIZA Global Sdn Bhd, had been formalised via a joint development agreement (JDA) on December 1, 2023.

The JDA was signed during the United Nations (UN) Climate Change Conference of the Parties (COP 28), with the JDA document exchange witnessed by the Yang di-Pertuan Agong Al Sultan Abdullah Sultan Ahmad Shah, and the UAE president Sheikh Mohamed Zayed Al Nahyan.

Following the JDA, on December 2, 2023, Citaglobal and Masdar signed a memorandum of understanding (MoU) with TRe for a strategic collaboration in renewable energy projects, including Project 2GW.

The MoU, also signed during COP 28, is to discuss further potential areas of collaboration, including Project 2GW, battery energy storage system (BESS), and potential collaboration on future renewable energy projects under the National Energy Transition Roadmap (NETR).

Venture into Renewable Energy

Citaglobal Executes Deal with Masdar Witness by King of Malaysia and UAE President

Citaglobal, Abu Dhabi energy giant Masdar to build US\$2bil solar farm in Pahang

NEW
STRAITS TIMES

December 1, 2023

Citaglobal Bhd and TIZA Global Sdn Bhd have entered into a 40:60 joint development agreement (JDA) with clean energy company Abu Dhabi Future Energy Company PJSC (Masdar) to build a US\$2 billion (RM9.75 billion) two-gigawatt (2GW) solar farm in Pahang.

According to Citaglobal, the project will involve the construction of ground-mounted solar arrays, floating solar farms and battery energy storage systems (BESS) across multiple sites in suitable land, dams, lakes and offshore perimeters across Pahang.

It will be developed in multiple phases, over five years.

The project forms part of the 10GW for which a Memorandum of Understanding (MoU) was signed between Masdar and the Malaysian Investment Development Authority (MIDA) on Oct 9.

As part of the MoU, Masdar formed a strategic partnership with MIDA and committed to the implementation of 10GW of clean energy projects in Malaysia with a total investment of US\$8 billion.

Being at the most advanced stage of the JDA, Citaglobal expects to be one of the earliest to initiate such project in Pahang.

Collaboration with Shanghai SUS Environment Co Ltd, China's Top WtE Company

Citaglobal signs RM15bil MoU with Chinese waste treatment firm

The Star

Monday, 18 Sep 2023

KUALA LUMPUR: Chinese waste treatment conglomerate Shanghai SUS Environment Co Ltd is looking to inject RM15bil of foreign direct investment into the Malaysian economy via a collaboration to establish a waste-to-energy (wtE) plant in the country.

It was reported yesterday that Malaysian civil engineering group, Citaglobal Bhd, had entered into a memorandum of understanding with SUS, which outlines the intention of the parties to potentially collaborate on developing WtE power plants in Malaysia.

The agreement was signed during the 20th China-ASEAN Expo and China-ASEAN Business and Investment Summit in Nanning, China, and was witnessed by Prime Minister Datuk Seri Anwar Ibrahim. Citaglobal said in a statement the plan is to divert all waste from unsustainable landfills to WtE plants and holistically resolve all waste disposal problems in Malaysia.

Citaglobal said it will assume a leading role in the project development of the WtE project in Malaysia, while SUS will be responsible for financing, building and operating the proposed projects. "WtE systems not only provide a high value source of renewable energy, but more importantly, its ability to convert waste into ash can significantly reduce the volume of waste that ends up in landfills.

"We see the development of WtE systems as an overall win-win situation for Malaysia. Besides complementing fossil fuel-based power sources, WtE systems generate renewable energy, reduce landfill requirements, and produce revenue for local municipalities and governments," said Citaglobal executive chairman and president Tan Sri Mohamad Norza Zakaria. SUS CEO Cindy Li Haiyan said the cooperation with Citaglobal will help to "leapfrog" the group's investment in the Malaysia WtE market.

Venture into Renewable Energy

Strategic Collaboration with Petronas in the RE Sector

Citaglobal to partner PETRONAS on RE applications

TheStar Wednesday, 28 Jun 2023

KUALA LUMPUR: Citaglobal Bhd has is exploring a collaboration with PETRONAS Global Technical Solutions Sdn Bhd on a wide range of renewable energy technologies and applications.

In a statement, it said it had entered into a memorandum of understanding (MoU) with the PETRONAS subsidiary for the development of battery energy storage system (BESS) applications and projects.

The technology and solutions shall be provided by Citaglobal Genetec BESS Sdn Bhd (CG BESS), a 50:50 joint venture company between Citaglobal and Genetec Technology Bhd that has developed the first Malaysian Battery Energy Storage System, MYBESS.

"This shall cover the installation of BESS to accelerate the technology advancement and green electron generation with deployment of 246 kWh of MYBESS for PETRONAS' Center of Excellence for Renewable Energy (CEFORE).

"There will also be a joint feasibility study for scaling up BESS technology solutions in all PETRONAS existing and future facilities," said the statement.

The collaboration will also entail feasibility studies on using gas engines for flare gas recovery and other gaseous such as hydrogen, the application of waste-to-energy and heat-to-energy in PETRONAS plants and carbon capture and utilisation initiatives in PETRONAS plants.

Under the MoU, Citaglobal will work with PETRONAS to introduce technology advancements in material based formulations such as Graphene, as well as in the area of Energy Management Systems (EMS).

East Coast Rail Link Independent Power Producer Project (“ECRL IPP Project”)

Citaglobal, Reneuco establish 60:40 SPV to undertake ECRL IPP project

THE EDGE
MARKETS
MAKE BETTER DECISIONS

KUALA LUMPUR (April 20): Citaglobal Bhd and Reneuco Bhd, which have won a tender to develop an independent power producer (IPP) project for the East Coast Rail Link (ECRL) network, on Thursday (April 20) signed an agreement to formalise their collaboration via a new special purpose vehicle (SPV).

Citaglobal will contribute 60% and Reneuco 40% of the RM500,000 initial share capital of the SPV, said the two groups in separate bourse filings.

They said Citaglobal will lead the negotiations with Malaysia Rail Link Sdn Bhd (MRL) to finalise the terms and conditions for the IPP project.

MRL — an entity of the Ministry of Finance (Incorporated) or MOF Inc — is developing the ECRL project and will operate it in a 50:50 joint venture with China Communications Construction Company.

Citaglobal (formerly known as WZ Satu Bhd) and Reneuco (formerly known as KPower Bhd) had won the tender to develop the IPP project for the ECRL network in December last year.

The SPV, called Citaglobal Reneuco ECRL Energy Solution Sdn Bhd, will undertake the financing, construction and operation of the project.

The proposal submitted by the SPV involves the supply of renewable power to commercial or industrial parks along the ECRL's 640km alignment.

Share price of Citaglobal closed 3 sen or 2.10% higher at RM1.46, valuing the group at RM554.17 million.

Reneuco finished unchanged at 23 sen, giving it a market capitalisation of RM131.64 million.

East Coast Rail Link Independent Power Producer Project ("ECRL IPP Project")

Citaglobal consortium wins ECRL IPP bid

TheStar Wednesday, 21 Dec 2022

KUALA LUMPUR: Citaglobal Bhd's consortium with Reneuco Bhd has received a letter of intent to become the independent power producer for the East Coast Rail Link (ECRL) project.

In a statement, the group said the 50:50 joint venture with Reneuco had accepted the letter of intent on Wednesday following the request for proposal from Malaysia Rail Link Sdn Bhd (MRL).

"In accordance to the letter, MRL intends to engage the consortium for the planning, design, financing, development, construction, installation, completion, commissioning and operation of the ECRL IPP Project," said Citaglobal.

According to Citaglobal Executive Chairman and President and major shareholder Tan Sri Mohamad Norza Zakaria, the contract is in alignment with its vision to become a major player in the renewable energy segment and to build a recurring income base for the company moving forward.

"We are grateful and honored to have won this national contract via a competitive bidding exercise.

"Citaglobal will definitely do its part in executing and realizing the ECRL IPP Project together with our partner, Reneuco," he added

Development of Battery Cell Plant and Battery Energy Storage System (“BESS”) Solutions

Citaglobal inks deal with Indonesian state-owned firm for battery energy projects

THE EDGE
MARKETS
MAKE BETTER DECISIONS

KUALA LUMPUR (Jan 9): Citaglobal Bhd (formerly known as WZ Satu Bhd) has inked a memorandum of understanding (MOU) for the proposed development of a battery cell manufacturing plant and battery energy storage system (BESS).

In a statement on Monday (Jan 9), the company said the MOU with PT Industri Baterai Indonesia or Indonesia Battery Corporation (IBC) shall remain in effect over the next one year.

IBC was established by four Indonesian state-owned enterprises (PT Aneka Tambang Tbk, Mining Industry of Indonesia, Perusahaan Listrik Negara and PT Pertamina), with the vision of maximizing Indonesian natural resources through the development of battery electric vehicles and the battery industry ecosystem in Indonesia.

The execution of the MOU augurs well for both sides, which have strategic plans and focus to expand meaningfully into the renewable energy space.

MYBESS - Malaysia's First BESS

Citaglobal-Genetec JV unveils Malaysia's first locally produced battery energy storage system

BANGI (April 11): Citaglobal Genetec BESS Sdn Bhd, a 50:50 joint venture (JV) between Citaglobal Bhd and Genetec Technology Bhd, on Tuesday (April 11) unveiled the country's first locally developed and produced battery energy storage system by showcasing its fully operational one-megawatt BESS prototype (MYBESS), which it piloted in end-2022 and now supports the energy needs of Genetec's EPIC plant.

The latest development follows the October 2022 agreement between Citaglobal and Genetec to develop battery storage management systems to store and manage excess power from renewable energy (RE) generation.

"MYBESS caters to different industry verticals — from transport, manufacturing, energy supply and distribution, to telecommunications — especially in grid integration to manage intermittent RE resources, which remains a challenge," according to Citaglobal Genetec BESS chairman Tan Sri Dr Mohamad Norza Zakaria.

"In short, this battery energy storage system solves many of our existing challenges in the distribution of power, storage, scalability and portability. When come, the scalability and portability of the battery energy storage system solution, with an RE source such as solar, allow businesses and communities to get around challenges found within conventional electrification. It is a viable and cost-competitive product," he said during the launch of the battery energy storage system at Genetec's EPIC Plant here.

MYBESS - Malaysia's First BESS

Official Launching by YB Minister of Investment, Trade & Industry on 11 April 2023

MYBESS - Malaysia's First BESS

Citaglobal, Genetec Accelerates Renewable Energy Adoption Through MYBESS

BUSINESS TODAY

May 19, 2023

Kebawah Duli Yang Maha Mulia Seri Paduka Baginda Yang di-Pertuan Agong Al-Sultan Abdullah Ri'ayatuddin Al-Mustafa Billah Shah Ibni Almarhum Sultan Haji Ahmad Shah Al Musta'in Billah and Kebawah Duli Yang Maha Mulia Seri Paduka Baginda Raja Permaisuri Agong Tunku Azizah Aminah Maimunah Iskandariah ti Almarhum Al-Mutawakkil Alallah Sultan Iskandar Al Haj graced the Citaglobal Genetec BESS' ("Citaglobal") festive "Majlis Rumah Terbuka Aidilfitri 2023" at the Genetec Technology EPIC Plant ("Genetec EPIC plant") today.

The event follows the Company's recent launch of Malaysia's first locally developed and produced Battery Energy Storage System ("BESS") at the Genetec EPIC plant on 11 April 2023. During the launch, the Company showcased the fully operational 1MW BESS prototype ("MYBESS") that was successfully developed and piloted in December 2022, and currently supports the Genetec EPIC plant's energy needs.

Citaglobal Chairman Tan Sri Dato' Sri Mohamad Norza Zakaria said, "Globally, we are seeing a significant shift towards renewable energy ("RE"). On our part, Citaglobal Genetec BESS is working hard to support this shift within the region, especially in supporting the nation's energy sufficiency efforts in a sustainable and affordable manner. Malaysia's pledge to commit to achieve net zero carbon by 2050 sets us ahead of our regional peers, and we are the frontliners in this transition. With the launch of MYBESS last month, we have been working hard to engage different stakeholders to build awareness and trust, whilst ensuring continuous innovations and developments to provide a technology and hardware is reliable and sustainable. We hope that the MYBESS end-to-end solution will be able to play a role in supporting our nation's RE and electrification ambitions."

MYBESS - Malaysia's First BESS

Showcase & Briefing on MYBESS to KDYMM Seri Paduka Baginda Yang Di-pertuan Agong on 18 May 2023

About Citaglobal Genetec BESS

Citaglobal Genetec BESS Sdn Bhd is a JV company between Citaglobal Berhad ("Citaglobal") and Genetec Technology Berhad ("Genetec").

BESS technology developed by Citaglobal Genetec BESS aims to offer the most technologically advanced Battery Energy Storage System ("BESS") that can store and manage power by minimising loss of energy.

Background

- BESS solution is specialised for renewable energy applications

Vision

- World-class technology in BESS which aligned in developing round-the-clock energy storage capability aspiration

Unique Advantages

- Locally developed solution
- Homegrown technology
- Highly customisable solutions
- Cost competitive BESS

Contractor for the Klang Valley Electrified Double Track Phase 2 (KVDT2) Project

Citaglobal secures RM261mil contract for KVDT 2

TheStar

Tuesday, 09 May 2023

KUALA LUMPUR: Citaglobal Bhd said its wholly-owned subsidiary Citaglobal Engineering Services Sdn Bhd has secured a RM261mil contract for the Klang Valley Electrified Double Track Phase 2 (KVDT 2) project.

in a statement, the group said it received the letter of award from main contractor Dhaya Maju Infrastructure (Asia) Sdn Bhd (DMIA) for the supply, delivery, construction, successful completion and maintenance of bridges, culverts, drainage and fencing works that form part of the KVDT 2 project.

Citaglobal executive chairman, president and major shareholder Tan Sri Mohamad Norza Zakaria said the award brings the group's order book to about RM1 billion, and is expected to contribute positively to the earnings, earnings per share and net assets of the group during the contract period.

KVDT 2 is a rail rehabilitation venture that covers 265km of the electrified double-track network in the Klang Valley, Malaysia.

The project covers the stretch from Salak South to Seremban, and from Simpang Port Klang to Port Klang.

DMIA is currently running the KVDT 2 project with a joint venture, Dhaya Maju LTAT Sdn Bhd.

Decommissioning, Dismantling, Demolition and Disposal of Balance of Port Dickson Power Plant

Citaglobal's subsidiary awarded RM13m contract for decommissioning and demolition of power plant

The Malaysian Reserve
JOIN THE REAL CONVERSATION
Friday, June 2nd, 2023

Citaglobal Bhd has landed a RM13.3 million contract for the decommissioning, dismantling, demolition, and disposal of the balance of plant at Port Dickson Power Plant (PDPP).

In a bourse filing today, the company said its wholly-owned subsidiary, Citaglobal Engineering Services Sdn Bhd (CESSB), has officially accepted a letter of award from Port Dickson Power Bhd. The project is expected to be completed within a 12-month timeframe, aligning with CESSB's normal course of business

With this new contract, Citaglobal's order book, including its subsidiaries, is projected to reach approximately RM1 billion, further enhancing the company's growth prospects. Notably, the contract is anticipated to make a positive contribution to the group's earnings, earnings per share, and net assets throughout the duration of the project. PDPP, owned by PDPB, is a project under Malakoff Corporation Bhd.

The gas-fired power plant, with a capacity of 440 megawatts (MW), was commissioned in 1995 and operated as an independent power producer (IPP) until February 28, 2019, when its extended power purchase agreement (PPA) expired.

Citaglobal shares gained 7 sen or 5.15% to close at RM1.43 today, while its market capitalisation stood at RM597 million.

Development of Sanglang Integrated Jetty Project in Perlis

Citaglobal to develop jetty in Perlis; first phase contract sum is RM200m

THEEDGE
MARKETS
MAKE BETTER DECISIONS

KUALA LUMPUR (March 6): Citaglobal Bhd said it has secured a contract for the development of a jetty project in Perlis, raising its orderbook to RM933.2 million from RM733.2 million.

The group said its wholly owned subsidiary Citaglobal Engineering Services Sdn Bhd will undertake the Sanglang Integrated Jetty project for Mutiara Perlis Sdn Bhd.

"The full development of the Sanglang project is divided into four phases. The contract sum of Phase 1A is RM200 million, while the contract sum for the other phases has yet to be determined. Citaglobal will first finalise the award to execute Phase 1A of this project," the group said in a statement. The Sanglang project is developed under the Perlis Maritime Corridor, which aims to facilitate the state's development in terms of logistics, tourism, aquaculture and fisheries. This project will provide jetty facilities for berthing of merchant ships, luxury cruise and yachts, deep-sea fish and oil and gas; and provide maintenance, repair and overhauling services for merchant ships.

In the revised Budget 2023 tabled on Feb 24, an additional amount was specifically allocated to support the Sanglang project in order to handle petroleum cargo and bulk cargo.

"Our successful completion of Phase 1 of the Kedah Rubber City project could have been one of the factors in earning us the credentials to undertake this important project. Our immediate focus is to finalise Phase 1A of the Sanglang project contract as well and efficiently as possible," said Citaglobal executive chairman Tan Sri Mohamad Norza Zakaria.

This is the second project won by Citaglobal in Perlis in less than six months. On Aug 30, 2022, Citaglobal bagged a RM373.5 million contract to construct Phase 1 of the Perlis Inland Port.

Our Projects and Services

Energy Segment

Citaglobal Energy started with pipeline construction and over the years, we have grown from strength to strength in the oil & gas and petrochemical, working with clients, both local and international.

We are a leading service provider in the oil & gas and related industries. We serve a diverse range of clients that include multinational oil majors, national oil companies as well as multinational engineering and service providers.

We have established a good track record through our successfully completed projects with specialisation in the following areas:

- Piping & Structural Fabrication
- EPCC for Skid Packages i.e. Chemical Injection, Gas Metering, etc.
- Onshore Construction and Pipeline Installations
- Long Term Service Agreements for Maintenance Works
- Maintenance and services in specialized analyzers, valves and actuators.

Citaglobal Energy approaches each project with a primary emphasis on safety, quality compliance, and timely delivery, and ensures that projects are completed in a planned, controlled manner within budget. We are proud to have successfully achieved 17,286,669 manhours worked without lost time injury (LTI).

Units that are supplied by us can be customised to our clients specifications / requirements. We have the expertise as well as capabilities of packaging the units at our facility.

- **Complete Imported Units**
- **Locally Assembled Units**
- **Customized Applications**

We pride ourselves at being in the forefront of local gas engine packaging / assembly, whereby we have initiated with engine partners on locally assembling gas engines for the following markets:

- **Biogas (Landfill / Gasification / POME)**
- **Flare Gas – Offshore applications**
- **Natural Gas**

By having these units assembled locally, we will be able to have them run more efficiently and cost effectively.

Product Supplies

Hazardous Area Equipment & Accessories

The offshore industry demands the best in terms of reliability as well as safety, hence we at Citaglobal Powergen are able to deliver gensets and other rotating equipment that can operate in the following environments:

- **Zone 1 and Zone 2**
- **Rig safe**

These units require additional engineering in terms of safety devices as well as other forms of protection that have to be added to the units. We are able to supply new as well as re-furbished units in our rental fleet.

Citaglobal Powergen is the local Agent for Excen S.R.L. ATEX technology, whereby we are able to convert the following equipment's for use in Hazardous Environments

Generator Sets | Air Compressors | Pumps | Power Packs

Zone 2 Diesel Generator Sets with DNV 7.7-1 Lifting Frames

Diesel Generator Installed in SS316 Canopy, with Hydraulic Starting Skid

Quality Management System

WZS Industries obtained the ISO 9001:2000 certification in 2004. In 2018, the company improved on this by adhering to the latest ISO9001:2015 certification standards. The certifications has been designed for an organization to implement a Quality Management System (QMS) that establishes the conformity of products to specific requirements. A well-equipped Quality Control Laboratory had been set up to enhance the quality.
