

CITAGLOBAL

Empowering The Future

Corporate Profile

September 2024

Introduction

Citaglobal Berhad ("Citaglobal") is a Bumiputera-controlled Public Listed Company on the Main Market of Bursa Malaysia.

We are principally involved in Energy, Telecommunications, Civil Engineering & Construction, Property, Manufacturing and Financial Services.

Citaglobal aims to become a leading player in technology-driven industries that empower the future.

Citaglobal's energy segment involves construction related activities and specialised engineering services. They are consisting of engineering, procurement, construction and commissioning of energy and utilities projects.

Citaglobal is expanding its know how into renewable energy transition with focus on integrated green energy engineering, construction, installation and commissioning.

Citaglobal aspires to expand its footprint in the region. Its renewable energy solutions encompass Solar, Battery Energy Storage System ("BESS"), Carbon Capture and Biogas Engines. Leveraging on these strategies, Citaglobal is confident to achieve its aspiration to emerge as a leading regional player in renewable energy industry.

Collaboration with Shanghai SUS Environment Co Ltd, China's Top WtE Company

Citaglobal to set up SPV with China govt-linked unit for green energy projects in Pahang

KUALA LUMPUR (July 15): Citaglobal Bhd (KL:CITAGLB) has entered into a joint development framework agreement (JDFA) with Shanghai SUS Environment Co Ltd, a China government-linked entity, to develop waste-to-energy projects in Pahang.

SUS Environment is a wholly owned subsidiary of SUS Holding Ltd, which supplies solid waste incinerators and is a developer of integrated environmental solutions

In a filing with Bursa Malaysia on Monday, Citaglobal said the collaboration will focus on converting municipal waste into green energy and developing agricultural waste — such as empty fruit bunches (EFB) and palm oil sludge — into biomass energy. Citaglobal said the JDFA is legally binding and will be used for the incorporation of a joint special purpose vehicle (SPV), with the company holding a 49% stake while the remaining 51% stake will be held by SUS Environment. The SPV's initial paid-up share capital is RM1 million, with SUS Environment contributing RM510,000 and Citaglobal contributing RM490,000, subject to the agreed business and development plan. The initial investment will be allocated for working capital.

"Our collaboration with SUS Environment will focus on reducing waste generation, promoting waste repurposing, and ensuring compliance with environmental regulations," Citaglobal executive chairman and president Tan Sri Dr Mohamad Norza Zakaria said. "This collaboration with SUS Environment is a significant step towards achieving our shared vision of promoting sustainable waste management practices in Malaysia," he added. In September 2023, Citaglobal and SUS Environment signed a memorandum of understanding for this collaboration during the 20th China-Asean Expo and China-Asean Business and Investment Summit.

Citaglobal wins 30-year concession to power up ECRL

Citaglobal-Reneuco consortium wins 30-year concession to power up ECRL

February 22, 2024

KUALA LUMPUR (Feb 21): A consortium between Citaglobal Bhd and Reneuco Bhd has secured a 30-year concession to supply electricity to the East Coast Rail Link (ECRL) from project owner Malaysia Rail Link Sdn Bhd (MRL).

The concession includes the development of power transmission and interconnection facilities valued at RM600 million, which is expected to be commissioned in stages by mid-2026, the two companies said in separate statements.

It also carries an option for MRL to renew the concession for an additional 30 years, the companies said. Citaglobal, which is in engineering and construction, owns 60% of the consortium, while Reneuco, a utilities services firm that recently fell into Practice Note 17 (PN17) status after its external auditor issued a disclaimer of opinion on its accounts, owns the remaining 40%.

The conditional contract follows a separate tender won by a 50:50 joint venture between the two companies in December 2022 to develop an independent power producer (IPP) project for the rail network. At the time, the proposal submitted by the JV involved the supply of electricity to commercial and industrial parks along the ECRL's 665km alignment from Port Klang, Selangor to Kota Bahru, Kelantan.

While Citaglobal and Reneuco did not reveal the size of its IPP tender then, the latest win on Wednesday includes plans for their 60:40 consortium to provide up to 100MW of renewable energy (RE) to enable the ECRL network "to achieve an energy mix of 30% green energy", the statements read. The power supply contract is exclusive and will provide electricity for both traction and non-traction systems of the rail project, they noted.

The contract will allow Citaglobal to broaden its presence in the energy sector, particularly the RE segment, and further diversify its revenue and earnings base to build recurrent income streams, said executive chairman Tan Sri Mohamad Norza Zakaria.

2 News

STARBIZ, MONDAY 4 DECEMBER 2023

ENERGY

By SYAZWANI HASNIZAM syazwani@thestar.com.my

DUBAI: A comprehensive policy which provides full support to local players is essential to move the national renewable energy (RE) agenda a step further, according to Citaglobal Bhd.

Executive chairman and president Tan Sri Mohamad Norza Zakaria said the group is ready to execute new RE-related projects, in line with the framework to be implemented by the government.

"We want to highlight to the government that we are fully supportive of the policies and we are more than ready and eager to start as soon as possible," he told StarBiz.

An agreement ceremony of Citaglobal and TIZA Global Sdn Bhd as a consortium, together with Abu Dhabi Future Energy Co PJSC (Masdar), was signed with the total development cost of RM9.75bil last Friday at the United Nations climate change conference or COP28 here.

With the earlier memorandum of understanding (MoU) signed with Shanghai SUS Environment Co Ltd for waste-to-energy projects in October, which was estimated to inject an additional RM15bil in terms of foreign direct investment (FDI), Norza said the government and Citaglobal are working hand-in hand to encourage more FDIs into the country.

•

• •

•

•

"The foreign investors hope to get some form of support from our government either in the form of incentives or relaxation of policies which are competitive in the region.

"We hope the government will help to facilitate this, and we will also play our is to build up its order book via being

CITAGLOBAL

Support for local **RE players crucial**

Citaglobal says a comprehensive policy is timely

"We are just at the beginning and there are many more new opportunities knocking on our door but we will only choose those that bring the most value to our shareholders."

Tan Sri Mohamad Norza Zakaria

part." he said.

On the agreement with Masdar, Norza said: "This shows the intention of the parties to work together and it isn't just talk. This demonstrates clearly that if all stakeholders work together, projects can be materialised."

The project involved the proposed development of up to 2GW of RE, and will see the construction of ground-mounted solar arrays, floating solar farms and battery energy storage systems (Bess) across multiple sites in suitable land, dams, and lakes across Pahang.

Norza said Citaglobal's overall strategy

turnkey contractor.

Once it has grown in size over the next five to 10 years, the company would progressively become an asset owner.

The asset-light strategy is to ensure Citaglobal grows its balance sheet and capital structure in an orderly manner.

"We will certainly invest more in asset owners when our balance sheet is stronger," he said.

Bess is anticipated to be one of the largest components of RE in Malaysia moving forward, according to Norza.

This is due to intermittency of energy supply, and the need to strengthen and stabilise the national grid.

"We are just at the beginning and there are many more new opportunities knocking on our door but we will only choose those that bring the most value to our shareholders," he said.

He said based on the group's existing order book of more than RM1bil, the construction sector will temporarily contribute to the bulk of its profits while building for the renewable energy and telecommunication sectors.

"Nonetheless, it is our goal to transform to become an RE and telecommunication player in the future," he said.

In addition, he stated the group is constantly looking for suitable partners who can join forces with Citaglobal to make the 2GW project a success.

Parties such as TNB Renewables Sdn Bhd, a wholly owned subsidiary of Tenaga Nasional Bhd, and SPIC Energy, a subsidiary of China State Power Investment Corp, are among the external parties that have expressed interest to be a part of the project.

On a separate note, Citaglobal is one of the main sponsors of the Malaysian Pavilion at COP28 with the intention of making a significant and powerful impact in the RE space.

Citaglobal and Masdar ink MOU with TNB Renewables for Participation in Pahang RE Project

Citaglobal, Masdar, and TNB Renewables partner for a RM9.75bil solar farm in Pahang

STRAITSTIMES

December 4, 2023

TNB Renewables Sdn Bhd (TRe), a wholly-owned subsidiary of Tenaga Nasional Bhd (TNB), is keen on a partnership with Citaglobal Bhd for the development of renewable energy (RE) projects in Malaysia

Potential areas of collaboration between TNB and Citaglobal include Project 2GW, a US\$2 billion (RM9.75 billion) 2-gigawatt (2GW) solar farm project in Pahang.

A 60:40 consortium for Project 2GW, comprising United Arab Emirates (USE) state-owned renewable energy company Masdar, Citaglobal and TIZA Global Sdn Bhd, had been formalised via a joint development agreement (JDA) on December 1, 2023.

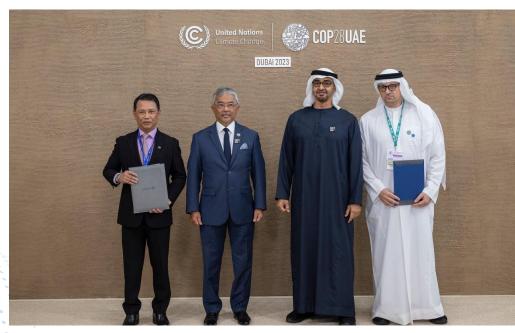

The JDA was signed during the United Nations (UN) Climate Change Conference of the Parties (COP 28), with the JDA document exchange witnessed by the Yang di-Pertuan Agong Al Sultan Abdullah Sultan Ahmad Shah, and the UAE president Sheikh Mohamed Zayed Al Nahyan.

Following the JDA, on December 2, 2023, Citaglobal and Masdar signed a memorandum of understanding (MoU) with TRe for a strategic collaboration in renewable energy projects, including Project 2GW.

The MoU, also signed during COP 28, is to discuss further potential areas of collaboration, including Project 2GW, battery energy storage system (BESS), and potential collaboration on future renewable energy projects under the National Energy Transition Roadmap (NETR).

Citaglobal Executes Deal with Masdar Witness by King of Malaysia and UAE President

Citaglobal, Abu Dhabi energy giant Masdar to build US\$2bil solar farm in Pahang

STRAITSTIMES

December 1, 2023

Citaglobal Bhd and TIZA Global Sdn Bhd have entered into a 40:60 joint development agreement (JDA) with clean energy company Abu Dhabi Future Energy Company PJSC (Masdar) to build a US\$2 billion (RM9.75 billion) two-gigawatt (2GW) solar farm in Pahang.

According to Citaglobal, the project will involve the construction of ground-mounted solar arrays, floating solar farms and battery energy storage systems (BESS) across multiple sites in suitable land, dams, lakes and offshore perimeters across Pahang.

It will be developed in multiple phases, over five years.

The project forms part of the 10GW for which a Memorandum of Understanding (MoU) was signed between Masdar and the Malaysian Investment Development Authority (MIDA) on Oct 9.

As part of the MoU, Masdar formed a strategic partnership with MIDA and committed to the implementation of 10GW of clean energy projects in Malaysia with a total investment of US\$8 billion.

Being at the most advanced stage of the JDA, Citaglobal expects to be one of the earliest to initiate such project in Pahang.

Strategic Collaboration with Petronas in the RE Sector

Citaglobal to partner PETRONAS on RE applications

TheStar Wednesday, 28 Jun 2023

KUALA LUMPUR: Citaglobal Bhd has is exploring a collaboration with PETRONAS Global Technical Solutions Sdn Bhd on a wide range of renewable energy technologies and applications.

In a statement, it said it had entered into a memorandum of understanding (MoU) with the PETRONAS subsidiary for the development of battery energy storage system (BESS) applications and projects.

The technology and solutions shall be provided by Citaglobal Genetec BESS Sdn Bhd (CG BESS), a 50:50 joint venture company between Citaglobal and Genetec Technology Bhd that has developed the first Malaysian Battery Energy Storage System, MYBESS.

"This shall cover the installation of BESS to accelerate the technology advancement and green electron generation with deployment of 246 kWh of MYBESS for PETRONAS' Center of Excellence for Renewable Energy (CEFORE).

"There will also be a joint feasibility study for scaling up BESS technology solutions in all PETRONAS existing and future facilities," said the statement.

The collaboration will also entail feasibility studies on using gas engines for flare gas recovery and other gaseous such as hydrogen, the application of waste-to-energy and heat-to-energy in PETRONAS plants and carbon capture and utilisation initiatives in PETRONAS plants.

Under the MoU, Citaglobal will work with PETRONAS to introduce technology advancements in material based formulations such as Graphene, as well as in the area of Energy Management Systems (EMS).

East Coast Rail Link Independent Power Producer Project ("ECRL IPP Project")

Citaglobal, Reneuco establish 60:40 SPV to undertake ECRL IPP project

KUALA LUMPUR (April 20): Citaglobal Bhd and Reneuco Bhd, which have won a tender to develop an independent power producer (IPP) project for the East Coast Rail Link (ECRL) network, on Thursday (April 20) signed an agreement to formalise their collaboration via a new special purpose vehicle (SPV).

Citaglobal will contribute 60% and Reneuco 40% of the RM500,000 initial share capital of the SPV, said the two groups in separate bourse filings.

They said Citaglobal will lead the negotiations with Malaysia Rail Link Sdn Bhd (MRL) to finalise the terms and conditions for the IPP project.

MRL — an entity of the Ministry of Finance (Incorporated) or MOF Inc — is developing the ECRL project and will operate it in a 50:50 joint venture with China Communications Construction Company.

Citaglobal (formerly known as WZ Satu Bhd) and Reneuco (formerly known as KPower Bhd) had won the tender to develop the IPP project for the ECRL network in December last year.

The SPV, called Citaglobal Reneuco ECRL Energy Solution Sdn Bhd, will undertake the financing, construction and operation of the project.

The proposal submitted by the SPV involves the supply of renewable power to commercial or industrial parks along the ECRL's 640km alignment.

Share price of Citaglobal closed 3 sen or 2.10% higher at RM1.46, valuing the group at RM554.17 million.

Reneuco finished unchanged at 23 sen, giving it a market capitalisation of RM131.64 million.

Development of Battery Cell Plant and Battery Energy Storage System ("BESS") Solutions

Citaglobal inks deal with Indonesian state-owned firm for battery energy projects

KUALA LUMPUR (Jan 9): Citaglobal Bhd (formerly known as WZ Satu Bhd) has inked a memorandum of understanding (MOU) for the proposed development of a battery cell manufacturing plant and battery energy storage system (BESS).

In a statement on Monday (Jan 9), the company said the MOU with PT Industri Baterai Indonesia or Indonesia Battery Corporation (IBC) shall remain in effect over the next one year.

IBC was established by four Indonesian state-owned enterprises (PT Aneka Tambang Tbk, Mining Industry of Indonesia, Perusahaan Listrik Negara and PT Pertamina), with the vision of maximizing Indonesian natural resources through the development of battery electric vehicles and the battery industry ecosystem in Indonesia.

The execution of the MOU augurs well for both sides, which have strategic plans and focus to expand meaningfully into the renewable energy space.

Citaglobal-Genetec JV unveils Malaysia's first locally produced battery energy storage system

MARKETS

BANGI (April 11): Citaglobal Genetec BESS Sdn Bhd, a 50:50 joint venture (JV) between Citaglobal Bhd and Genetec Technology Bhd, on Tuesday (April 11) unveiled the country's first locally developed and produced battery energy storage system by showcasing its fully operational onemegawatt BESS prototype (MYBESS), which it piloted in end-2022 and now supports the energy needs of Genetec's EPIC plant.

The latest development follows the October 2022 agreement between Citaglobal and Genetec to develop battery storage management systems to store and manage excess power from renewable energy (RE) generation.

"MYBESS caters to different industry verticals — from transport, manufacturing, energy supply and distribution, to telecommunications — especially in grid integration to manage intermittent RE resources, which remains a challenge," according to Citaglobal Genetec BESS chairman Tan Sri Dr Mohamad Norza Zakaria.

"In short, this battery energy storage system solves many of our existing challenges in the distribution of power, storage, scalability and portability. When comed, the scalability and portability of the battery energy storage system solution, with an RE source such as solar, allow businesses and communities to get around challenges found within conventional electrification. It is a viable and cost-competitive product," he said during the launch of the battery energy storage system at Genetec's EPIC Plant here.

Official Launching by YB Minister of Investment, Trade & Industry on 11 April 2023

Citaglobal, Genetec Accelerates Renewable Energy Adoption Through MYBESS

BUSINESSTODAY May 19, 2023

Kebawah Duli Yang Maha Mulia Seri Paduka Baginda Yang di-Pertuan Agong Al-Sultan Abdullah Ri'ayatuddin Al-Mustafa Billah Shah Ibni Almarhum Sultan Haji Ahmad Shah Al Musta'in Billah and Kebawah Duli Yang Maha Mulia Seri Paduka Baginda Raja Permaisuri Agong Tunku Azizah Aminah Maimunah Iskandariah ti Almarhum Al-Mutawakkil Alallah Sultan Iskandar Al Haj graced the Citaglobal Genetec BESS' ("Citaglobal") festive "Majlis Rumah Terbuka Aidilfitri 2023" at the Genetec Technology EPIC Plant ("Genetec EPIC plant") today.

The event follows the Company's recent launch of Malaysia's first locally developed and produced Battery Energy Storage System ("BESS") at the Genetec EPIC plant on 11 April 2023. During the launch, the Company showcased the fully operational 1MW BESS prototype ("MYBESS") that was successfully developed and piloted in December 2022, and currently supports the Genetec EPIC plant's energy needs.

Citaglobal Chairman Tan Sri Dato' Sri Mohamad Norza Zakaria said, "Globally, we are seeing a significant shift towards renewable energy ("RE"). On our part, Citaglobal Genetec BESS is working hard to support this shift within the region, especially in supporting the nation's energy sufficiency efforts in a sustainable and affordable manner. Malaysia's pledge to commit to achieve net zero carbon by 2050 sets us ahead of our regional peers, and we are the frontliners in this transition. With the launch of MYBESS last month, we have been working hard to engage different stakeholders to build awareness and trust, whilst ensuring continuous innovations and developments to provide a technology and hardware is reliable and sustainable. We hope that the MYBESS end-to-end solution will be able to play a role in supporting our nation's RE and electrification ambitions."

About Citaglobal Genetec BESS

Citaglobal Genetec BESS Sdn Bhd is a JV company between Citaglobal Berhad ("Citaglobal") and Genetec Technology Berhad ("Genetec").

Ľ\$Þ

BESS technology developed by Citaglobal Genetec BESS aims to offer the most technologically advanced Battery Energy Storage System ("BESS") that can store and manage power by minimising loss of energy.

Background

• BESS solution is specialised for renewable energy applications

Vision

World-class technology in BESS which aligned in developing roundthe-clock energy storage capability aspiration

- Locally developed solution
- Homegrown technology
- o Highly customisable solutions
- Cost competitive BESS

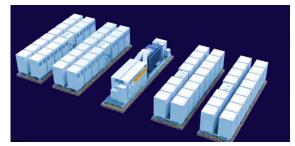

Exclusive partnership between Citaglobal and Genetec

Citaglobal Energy started with pipeline construction and over the years, we have grown from strength to strength in the oil & gas and petrochemical, working with clients, both local and international.

We are a leading service provider in the oil & gas and related industries. We serve a diverse range of clients that include multinational oil majors, national oil companies as well as multinational engineering and service providers.

We have established a good track record through our successfully completed projects with specialisation in the following areas:

- Piping & Structural Fabrication
- EPCC for Skid Packages i.e. Chemical Injection, Gas Metering, etc.
- Onshore Construction and Pipeline Installations
- Long Term Service Agreements for Maintenance Works
- Maintenance and services in specialized analyzers, valves and actuators.

Citaglobal Energy approaches each project with a primary emphasis on safety, quality compliance, and timely delivery, and ensures that projects are completed in a planned, controlled manner within budget. We are proud to have successfully achieved 17,286,669 manhours worked without lost time injury (LTI).

Product Categories

Diesel Generators

Units that are supplied by us can be customised to our clients specifications / requirements., We have the expertise as well as capabilities of packaging the units at our facility.

- Complete Imported Units
- Locally Assembled Units
- Customized Applications

We pride ourselves at being in the forefront of local gas engine packaging / assembly, whereby we have initiated with engine partners on locally assembling gas engines for the following markets :

Biogas (Landfill / Gasification / POME)

- Flare Gas Offshore applications
- Natural Gas

•

By having these units assembled locally, we will be able to have them run more efficiently and cost effectively.

Energy Segment

Product Supplies

Hazardous Area Equipment & Accessories

The offshore industry demands the best in terms of reliability as well as safety, hence we at Citaglobal Powergen are able to deliver gensets and other rotating equipment that can operate in the following environments :

• Zone 1 and Zone 2

TAGLOBAL

• Rig safe

These units require additional engineering in terms of safety devices as well as other forms of protection that have to be added to the units. We are able to supply new as well as refurbished units In our rental fleet.

Citaglobal Powergen is the local Agent for Excen S.R.L. ATEX technology, whereby we are able to convert the following equipment's for use in Hazardous Environments

Generator Sets | Air Compressors | Pumps | Power Packs

Zone 2 Diesel Generator Sets with DNV 7.7-1 Lifting Frames

Diesel Generator Installed in SS316 Canopy, with Hydraulic Starting Skid

SS316L Genset Canopy

Energy Segment

Current Projects

EPCC Projects

With our in-house team of engineers, we are able to undertake projects which require engineering, procurement, construction as well as commissioning, all being handled under one roof to ensure the client obtains the best possible price and quality. Projects which we handle :

- Diesel Generator Installations
- Mobile Diesel / Gas Generator Sets
- Gas Generating Plants Natural / Biogas
- Diesel / Gas Power Plants

Mobile Diesel Gensets

- Customized Design units are all designed to conform to local standards
- **Flexibility** we are able to suit the clients requirements on engine and equipment used
- Up to date ideas and innovations by utilizing and engaging in specialists we are able to adopt the latest equipment into our packages
- **Customizable controllers and control systems** we are able to provide from simple to very advanced control systems
- **Cam-Lok panel** which is designed into the truck's body. Through careful design we are able to integrate this connection onto the side of the lorry, thus providing the operator with greater flexibility when hooking up the generator.

Quality Management System

WZS Industries obtained the ISO 9001:2000 certification in 2004. In 2018, the company improved on this by adhering to the latest ISO9001:2015 certification standards. The certifications has been designed for an organization to implement a Quality Management System (QMS) that establishes the conformity of products to specific requirements. A well-equipped Quality Control Laboratory had been set up to enhance the quality.
